**Celebrating 90 years of British manufacturing**

This year we are celebrating our 90th anniversary which represents an important milestone for the company. We have continued over the years to maintain our quality and remain a British based manufacturing business.

We would like to thank all our customers who have shown such strong support in 2011 and the many years previous to this, our success would be impossible without you.

Our range of products continues to evolve and expand as we invest more time and effort into Research & Development and the Marketing of our products.

Please always remember that we have the capabilities of manufacturing products to customer ideas and designs if required.

From everyone at HBC, we wish you all the very best success in 2012.

Philip Coward, Managing Director

**CARRIAGE CHARGES 2012 (UK MAINLAND)**

£1 - £50 = £20 carriage, £51 - £274 = £15 carriage,  
£275+ = FREE carriage

# Saving your business time and money

## Managing your account is simple and efficient...

Using our secure online account service our customers can place orders and manage their account at any time of the day or night.

## 1% Saver System... Saving your business 1% on everything when placing orders online!

Once logged in, account customers can place orders easily and efficiently. The 1% saver system is in place for account customers ordering online with all discount pricing shown on your account. Make your choices online, place your order and it will show with a 1% saving at checkout and on your invoices. Save order baskets for future reference or use our quick ordering system. All Internet orders are automatically processed with an email acknowledgement by return.

View any **Outstanding Orders**, **Account Statements**, **Credit Notes** and your **Invoice History** all at the touch of a button.

Our Management Information System enables our customers to access real time data to help manage your purchasing and budgetary control, saving both time and money.

## Let us help

If you are having problems setting up your account, accessing information or placing orders online, contact us. Your dedicated Customer Sales Adviser can help you over the phone. Alternatively send us an email and we will come back to you at your convenience.

We are always happy to talk to you and discuss orders over the phone and advise you on prior purchases.

## Expert Product Knowledge

The level of product advice, technical training and supplier support available to help our customers make informed choices is second to none. Please let us know if you require one of our representatives to visit you and discuss the products, merchandising and further marketing assistance for your websites and your literature.

Our **e-brochures** are available online to help you with product choices or call if you wish to receive further printed copies. This provides you with page turning options and PDF downloads to make things easy.

**Ordering made easy through our website, e-mail, fax and calling direct to our head office.**

# Environmental responsibility Environmental commitment

HBC is committed to a policy which is sympathetic to protecting and preserving our environment. Not only with our products themselves, but with how we manufacture and package them.

All the vegetable fibres used in our brushes are sourced from third world countries thus supporting their local communities.

HBC has a FSC® (Forest Stewardship Council) Chain of Custody certification (TT-COC-001562) for wooden brush backs and other wooden products. This means that the raw material to produce these wooden parts can be traced back to an FSC certified forest. The non-FSC timber used by the company comes from managed forests or suppliers with other sustainable timber schemes (such as the German PEFC™ scheme).

We encourage our customers where possible to change from buying brushes with fitted handles to threaded handles. Packaging is much smaller, reducing transport costs and carbon emissions.

HBC strives to use a minimal amount of packaging materials and complies with all EPA (Environmental Protection Agency) packaging waste regulations. The weight of packaging per product is available on request.

All plastic products manufactured by HBC comply with EPA (Environmental Protection Agency) recycling regulations.

Energy and water consumption is a prime concern and air from our main extraction system is recycled back into the production building to reduce the loss of heat.

HBC is committed to a policy which is sympathetic to environmental issues and strives to minimise adverse environmental impact at all stages of production and, where possible, we use environmentally harmonious components.

The Company requires that all packaging received must be recycled.

Our lighting in the main warehouse has been replaced with an ultra-efficient lighting system.

100%

Wood from well-managed forests

FSC® TT-COC-001562

# Boxed to Go

A range of good quality British made brushes that are sold attractively boxed ready for display

RIO - MULTI-COLOURED FIBRE BRUSHES

## Durable & high quality traditional brushware

Salmon Traditional Quality brushware selected for the tough demands required in farming, building and maintenance.

Using natural fibres for their particular qualities such as Bahia for strength, Sherbro for durability, coco for softness and polypropylene fills for longevity.

FITS ALL HACCP SYSTEMS**

## Benefit from both hygiene & efficiency

Salmon Hygiene Technology manufacture the most comprehensive and innovative line of manual cleaning tools for the food & beverage industry.

Technology and innovation that sets us apart:

- **Three quality levels for the industry environment**
- **Totally colour-coded tools made from FDA-approved materials**
- **Durable, heat and chemical resistant**
- **Easy to clean with quick drying tools**
- **Versatile products designed to remove debris, deep scrub & remove water**
- **Ergonomic design to ensure correct working positions**

### Documentation

Our systems are designed to improve and raise the visibility of your internal hygiene control, support HACCP compliance, and make it easier to maintain and document protocols for internal and external audits.

Our tools meet the stringent criteria of all the

regulatory authorities and comply with US and European legislation. We are members of the Professional Hygiene Brush Working Group. The PHB European charter exists to enable the purchasers of this type of product to be confident that they will be supplied with high quality professional brushware and further cleaning tools which comply with all existing hygiene regulations. The PHB Charter document can be supplied on request.

# Safety options for the food & beverage industry

## ★★★★★ Plus ULTIMATE

### Anti-Microbial Cleaning

- Containing silver-ion technology
- All brushes are Resin-Set as standard
- The ultimate safety in cleaning

### Resin-Set Brushware

- Prevention of dirt, moisture and bacteria in the tuft holes
- Assists with tuft retention
- Superior technology to all other methods

### Metal Detectable & Dissipative

- Detectable products show use of "All Due Diligence"
- Detected by conventional metal detection systems
- Available with Salmon Products® set up kit

Food & Beverage Safety Innovation

46

## ★★★★★ PROFESSIONAL

- Supreme quality and durability
- Innovative tools for problem areas
- Withstands high temperatures: 134°C/273°F
- Total colour coding with a choice of eight colours for prevention of cross-contamination, segregation and HACCP systems

Food & Beverage

55

## ★★★★★ PREMIER

- Ergonomic products that are extremely easy to clean
- Total colour coding with a choice of six colours to help avoid cross-contamination (HACCP)
- Withstands high temperatures: 134°C/273°F

# Anti-Microbial Cleaning

Salmon Hygiene Technology continues to strive to provide innovative solutions for cleaning managers with regard to the ever-present threats of disease and contamination.

- Containing silver-ion technology
- The ultimate safety in cleaning
- All brushes are Resin-set as standard

**The Technology...** The Range uses silver based anti-microbial additive built into all plastic parts. Used together with standard cleaning procedures, it effectively inhibits the growth of a broad range of moulds, mildews and bacteria on the surface of the products themselves.

The combination of low migration rates and a high melting point makes it especially suitable for intensive use and high temperature environments.

**Tested & Proven...** The silver based anti-microbial additive has successfully been tested by the Department of Public Health at the University of Helsinki in Finland and received the U.S. EPA (environmental protection agency) registration (EPA Reg 40810-18).

# Resin-set Brushware

Most food manufacturing and catering areas, where the security of monofilaments is of particular importance, require Resin-Set brushware. Salmon Hygiene Technology has developed a very effective improvement in brush filament retention, where each tuft is stapled into the brush back with food grade stainless steel staples in the normal way, and then epoxy resin is floated into a recess on the face of the brush. The resin permeates the entire tuft hole, covering the filaments and staples as it goes. The resin seals the face of the brush and makes the chance of a filament pulling out extremely remote, and inhibits the accumulation of dirt or moisture in the tuft holes.

### Leaders in Food Safety Innovation

- Designed for areas with high safety requirements such as Food Production Facilities
- Superior technology to **ALL** other methods
- Prevention of dirt, moisture and bacteria in the tuft holes
- Assists in tuft retention
- Durable and easy to clean
- Total Colour Coding in 8 colours for segregation and HACCP
- Withstands high temperatures: 134°C/273°F
- The ultimate safety solution

# Metal Detectable & Dissipative

Contamination of food or pharmaceutical products can cost you time, money and your reputation. The metal detectable range has been specifically designed for these industries.

### Tested & Proven...

All products listed in the Salmon Products® Metal Detectable Range have been independently tested by Mettler-Toledo Ltd, the leading manufacturer of metal detecting equipment. All products proved to be effective in both wet and dry conditions. The coloured plastic parts of the items in this range are detectable by metal detection machines and are food contact approved.

### Dissipative qualities

Independent test results show that they are slow dissipative and the ESD (electrostatic discharge) was zero. Therefore the products are safe for use in flammable atmospheres with ignition energies down to 0.25 millijoules.

# Automatic Shoe Cover Dispenser

## Improves hygiene & cleanliness

- Improves hygiene & cleanliness, reduces germs & infections
- Automatically fits over your shoes, no need to remove footwear
- Ideally suited for safety inspectors and audit checks
- Impress customers with this easy to use innovation
- Easy to load, innovative design
- Comes complete with 110 covers
- Refills available including slip resistant covers
- Great for use in: Food Production, Factories, Hospitals, Hotels, Schools, Catering Units, Farms, Dairies, Boats and New Houses

**AD1**  **Shoe Cover Dispenser Unit**  
Complete with 110 shoe covers 

**ADR2**  **Pack of 100 Replacement Shoe Covers**  

**ADR3**  **Pack of 100 Slip Resistant Replacement Shoe Covers**  

★★★★ PREMIER

## Ideal for Kitchens & Restaurants

- Ergonomic tools that are lighter in weight, ideal for kitchens & restaurants
- Totally colour coded tools
- Withstands temperatures up to 134°C
- Total colour coding with a choice of 6 colours for prevention of cross-contamination, segregation and HACCP systems

'!' on both sides  
Height: 670mm

## DRY MOPS

Flat mopping equipment gathers and traps fine dust quickly and gently leaving a dust free surface ready for mopping or polishing.

Synthetic heads generate a static charge which attracts and holds dust, wear well and have a good resistance to washing; the cotton heads are cheaper and have good absorption characteristics, but do not wear as well. Both types may be laundered at 50°C.

**SCIS/MOP1**

### Scissor Mop Head

Superior quality 'V' sweeper with 1570mm powder coated handles and 1000mm frames for cleaning large corridors and open areas. Sweeper heads must be bought separately  
Size: 1570 x 1000mm

**5102**

### Sweeper Heads

Cotton. For SCIS/MOP1

1 Pair

Low abrasive

ALH7

**Threaded Aluminium Handle**

With coloured hand grip. Size: 1360mm

ALH8

**Threaded Aluminium Handle**

With coloured sleeve. Size: 1550mm

HANDLES

**SPONGE MOPS**

Each mop has its own integral wringer and does not require a special mop bucket. It is ideal for use in smaller areas where there is a lot of excess water to be picked up.

SPNG/FRM1

**Sponge Mop Frame**

Metal frame with white plastic fittings

Coloured caps

Size: 1270mm

SPONGE1

**Sponge Mop Head**

Cellulose

Size: 320mm

SPONGE2

**Sponge Mop Head**

Do not subject to temperatures over 65°C

Polyurethane

Size: 320mm

SPONGE MOPS

**MOP3/200**

**Looped Polyester Mop**

Often used for applying polish.  
Coloured threaded socket. Bagged  
Weight: 200g

**MOP5/250**

**Looped Polyester 'Hygiemix' Yarn Mop**

Complete with stay flat band. Superior wearing,  
wicking & absorption qualities than conventional yarn.  
Coloured threaded socket. Bagged  
Weight: 250g

**KMOP7/560**

**Looped 'Hygiemix' Kentucky Mop**

Larger version of KMOP6/450  
Weight: 560g

**KMOP8/250**

**Super Absorbent Kentucky Strip Mop**

Soaks up to 5 times its weight in water  
Keeps a clean white look and not liable  
to shrinkage. Launderable at 30°C  
Weight: 250g

**MOP9/200**

**Bio Mop**

The best available mop. Contains 'Biokryl Plus™'  
which inhibits fungal and bacterial growth.  
Coloured threaded socket. Bagged  
Weight: 200g

**MOP10/130**

**Super Absorbent Strip Mop**

Soaks up to 5 times its weight in water  
Keeps a clean white look & not liable to shrinkage  
Launderable at 30°C  
Weight: 130g

**KMOP4/450 Blue Looped Polyester Kentucky Mop**

Complete with stay flat band & abrasive centre band  
for stubborn marks. Extremely durable.  
Often used for applying polish. Bagged.  
Weight: 450g

**KMOP6/450 Looped 'Hygiemix' Kentucky Mop**

Complete with stay flat band & abrasive centre band for  
stubborn marks. Mix of cotton, viscose & polyester.  
Superior wearing, wicking & absorption qualities  
than conventional yarn. Reduced shrinkage. Bagged  
Weight: 450g

**KMOP11/340**

**Bio Kentucky Mop**

The best kentucky Mop. Similar to KMOP6/450  
with the advantage of 'Biokryl Plus™'  
which inhibits fungal and bacterial growth.  
Bagged. Weight: 340g

**16KT**

**Standard Kentucky Mop**

Looped multifold yarn Kentucky mop  
with stay flat band &  
cotton centre band  
Size: No 16

**MOP1/200**

Coloured socket: 24mm

Size: 200g  

**MOP1/300**

**Standard Excel Mop**

Pure yarn, fully launderable  
Coloured socket: 24mm

Size: 300g  

**MOP2/200**

**Standard Excel Mop**

Twine, fully launderable  
Coloured socket: 24mm

Size: 200g  

**MOP2/300**

**Standard Excel Mop**

Twine, fully launderable  
Coloured socket: 24mm

Size: 300g  

**12PY**

**Economy Yarn Mop**

With metal socket for wooden handles: 24mm  
Size: No. 12

**14PY**

**Economy Yarn Mop**

With metal socket for wooden handles: 24mm  
Size: No. 14

**16PY**

**Economy Yarn Mop**

With metal socket for wooden handles: 24mm  
Size: No. 16

**12C**

**Economy Twine Mop**

With metal socket for wooden handles: 24mm  
Size: No. 12

**16C**

**Economy Twine Mop**

With metal socket for wooden handles: 24mm  
Size: No. 16

### Mop Weights Conversion Table

200g = No.12 Socket Mop • 450g = 16oz Kentucky Mop  
250g = No.14 Socket Mop • 560g = 20oz Kentucky Mop  
300g = No.16 Socket Mop

**ALH/CLIP1**

**Aluminium Handle & Kentucky Mop Holder**

Zinc plated holder. Coloured hand grip

**ALH/CLIP2**

**Aluminium Handle & Kentucky Mop Holder**

Coloured plastic holder

**WH/CLIP4**

**Wooden Handle & Kentucky Mop Holder**

Zinc plated holder  
Lacquered wood handle: 1372 x 29mm

**KEN/CLIP**

**Plastic Kentucky Mop Holder**

PURE YARN is readily absorbant,  
TWINE for rougher surfaces

### THREADED HANDLES

Wooden handle: A48/1 (Page 21)  
Aluminium Handles: ALH5, ALH7, ALH8 (pages 63)

**ZP/FRM**

**Zinc Plated Kentucky Frame with Clip**

Socket: 29mm

CLOTHS

MFC210

**Superb Knitted Blue Microfibre Cloth**

Size: 400 x 400mm  
Weight: 310gsm

MFC-MAXI

**Microfibre Glass Cloth**

Size: 550 x 630mm

YD10

**Duster**

Size: 400 x 300mm  
Weight: 20g

**MICROFIBRE CLOTH** Ultra fine fibres effortlessly attract, hold and lift dirt, dust and grease from any surface. The special microfibre construction is so effective that no chemical cleaners are necessary and grease or oil can be removed with just a little water.

**Knitted Cleaning Cloth** Naturally absorbent and durable, the ribbed weave allows good purchase on ingrained dirt. They are economic to buy and may be laundered repeatedly at 60°C.

KC10

**Standard Dish Cloth**

Soft stockinette with blue edging  
Size: 280 x 330mm  
Weight: 31g

KC5

**Heavy Duty Floor Cloth**

Size: 440 x 460mm  
Weight: 68g

TT14/10PK

**Pack of 10 Tea Towels**

Superior quality cotton herringbone  
Size: 770 x 520mm

KC40

**General Purpose Cloth**

Soft stockinette with colour coded stripes  
Size: 300 x 400mm. Weight: 31g

NWC100

**Light Disposable Wipe**

Size: 600 x 300mm  
Weight: 40gsm

NWC120

**Anti-bacterial Perforated Semi-disposable Cloth**

Size: 480 x 360mm. Medium weight: 80gsm

PADS & SPONGES

**SP26/50PK Pack of 50 Scouring Pads**

Size: 225 x 150mm

**Non Woven Cloths** Highly absorbent and generally good for polishing, drying glass, china and other smooth surfaces. Light and strong, and don't tear easily even when wet. While some are disposable, most may be laundered. They keep their appearance well and dry quickly.

SP40/10PK

**Pack of 10 Gripped Sponge Scouring Pads**

Size: 130 x 70mm

SP27/10PK

**Pack of 10 Sponge Scouring Pads**

Size: 147 x 90mm

# Essential tools for seafood connoisseurs

**Breton Oyster Clamp** The safe and easy way to open oysters...

A traditional French design made from selected beechwood, exceptionally strong and well finished. This clamp wedges the oyster securely allowing complete control during opening.

All the tools you'll need to eat shellfish... **The Crustacean Kit** contains essential equipment required to break and enter a large range of shellfish including Lobster, Crab and Prawns.

## OYSTER1

### Breton Oyster Clamp

The clamp is supplied with a high quality Sabatier oyster knife, detailed instructions & attractively boxed

## CRUST1

### Crustacean Kit

Presented in an attractive, custom made, beechwood box the contents include:  
1 claw cracker, 4 lobster picks,  
4 seafood forks & 4 shellfish pins.

# Brush Care and Maintenance

It is essential to maintain your hygienic tools to prolong their use and also to recognise when they need replacing. Hygiene is essential.

### Procedures for cleaning hygienic tools

1. Remove all visible dirt and any foreign objects. Use a Salmon Hygiene Technology brush with stiff filaments to do so.
2. Clean the tool in a cleaning solution with a pH between 7.0-12.2. Alternatively clean in an industrial dishwasher (82°C/180°F).
3. Rinse with clean water.
4. If lime residues are formed on the tool after washing and use, these can be removed by washing in a cleaning solution with a pH between 7.0-12.2. Use a Salmon Hygiene Technology brush with stiff filaments to do so or clean in an industrial dishwasher (82°C/180°F).
5. Rinse with clean water.
6. If required tools can be disinfected after washing with an approved disinfectant. Salmon Hygiene Technology products tolerate all approved disinfectants.
7. Rinse with clean water to ensure the removal of any disinfectant residues on the tool before using it again for cleaning.
8. Please note. If required, most Salmon Hygiene Technology products can be sterilised by autoclaving. Many products can be autoclaved at temperatures up to 134°C. Please check product details in our Hygiene & Food Safety catalogue or online: [www.hillbrush.com](http://www.hillbrush.com)
9. Place the tool to dry on a Salmon Hygiene Technology wall bracket system (shown on page 65).

### Recognising when tools need replacing

1. When filaments are so entangled that particles can adhere to them.
2. When filaments are so discoloured that after cleaning they do not regain their original colour and it is difficult to see where dirt is lying.
3. When the brush back or plastic moulding is scratched or badly marked.
4. When the handle is broken or cracked.
5. When the filaments are worn or have been caught in something, increasing the risk of loose filaments.
6. When your system specifies that the tool must be replaced after a suitable period or if there may be a risk to food hygiene.

For more information on the 5S System please contact us to arrange a site visit.

# Helping our Distribution Partners

## CORPORATE DVD

This 10 minute film follows the growth of The Hill Brush Company over the past 90 years. There is vintage film demonstrating the traditional brush making craft mixed with today's innovative hygiene brushware. The DVD shows how the company has developed and responded to today's hygiene and food safety requirements; with innovation, expertise producing quality products that are durable and easy to use.

The DVD demonstrates the 3 levels of choice available within Salmon Hygiene Technology product line:

**ULTIMATE:** For use in high safety areas of food production.

- Anti-microbial Cleaning Tools
- Metal Detectable & Dissipative
- Resin Set Brushware

**PROFESSIONAL:** For use in large scale food production and factory environments.

**PREMIER:** For use in kitchens and restaurants.

The DVD can also be viewed online at the following link [www.hillbrush.com](http://www.hillbrush.com) or please call for your copy today

## Demonstration Equipment

For those wishing to show samples of the Salmon Hygiene Technology products with maximum impact, an aluminium demonstration case is available. This contains a selection of items including seven brooms and hand brushes, a squeegee, a short handle and a hanger.

There are seven major colours represented but we do offer a range of eight on colour coded brush stocks so we can adapt it to customer requirements.

# Marketing Support

## Design & Merchandising

From product development to innovative display solutions, our experienced in-house design team offers a comprehensive service for all our customer's requirements. By using the most advanced technology and design programmes we are able to quickly and efficiently bring ideas to life.

## Catalogues

There are many different versions of sales literature produced for individual product groups or for the complete HBC range. We are happy to provide our customers with sales literature which are available with distributor details for sales requirements.

Our Hygiene & Food Safety Catalogue is available in 18 languages:-

- Version 1 - GB, D, F, NL
- Version 2 - GB, NO, SV, FI
- Version 3 - PL, RU, BG, CZ
- Version 4 - GB, PT, FR, ES
- Version 5 - US, PT, FR, ES
- Version 6 - GB, JP, IN, CN

## Digital e-brochures

Ask us for the V-Cab links to use on your website free of charge. By using this page turning e-brochure option on your website you can quickly and easily demonstrate to your customers the product line available. Professional and easy to use. Use the link within your auto signature or send the file via email

## Posters and Zone Stickers

There are many variations of posters available for customers to display a product range or just enhance the look of your show area!

## Display Stands & Packaging

We have a range of display stands available to our customers, giving the products more presence and assisting in increased sales for your shop or showroom. We also have the capabilities to produce bespoke display options including pallet bins, counter top, floor standing, boxes and general packaging.

## Roller-Banners

We also have the option of Roller-Banners for loaning to distributors exhibiting at shows around the world. We can send you the images of banners available at the time and once you've decided on the banner of your choice, we will send it out to you free of charge. Please note that these are loan items and come complete with a spotlight above for added impact.

## Product images on DVD

We can also provide our customers with current product images (cut out and in high resolution) on DVD for your website and marketing literature. The DVD also includes 'action shots' from our catalogue and standard price lists.

# Printing, Branding & Labelling

Type of marking	Plate/ Set up charge	Minimum order quantity	Marked during production Code

Hot brand wood (with customer's brand)	YES	300	
Pad printing wood (up to 4 colours)	YES	300	PRINT/WSK
Pad printing plastic (up to 4 colours)	YES	300	PRINT/PSK
Label 76mm x 64mm	NO	300	LABEL76/64
Label 48mm x 24mm (bar code)	NO	300	LABEL48/24

Many of the items produced can be marked by hot branding, printing or labelling. There is a one-off charge for the production of special branding and printing plates, but hot branded names and numbers made up from available type blocks do not attract a set up charge.

The maximum brand area is 90mm x 65mm, and the maximum print area is 70mm x 70mm. Four colour printing is available.

The minimum order quantities shown above refer to the number of a particular shaped product base to be marked. This number could be made up of different products manufactured with the same shaped base, but with a minimum quantity per product of 60.

Most products are manufactured in large batches on a three month cycle, therefore customers requiring products to be marked during manufacture should ensure that orders are placed well in advance.

Most wooden stocks are made with hardwoods from professionally managed estates, where timber is felled under Licence and replanted.

Salmon Products® has an FSC chain of custody accreditation (TT/COC/1562) and is able to make FSC timber products and brushes to order.

# Brush Filling Materials

THE COMPANY IS ABLE TO SUPPLY THE FIBRES DESCRIBED BELOW AND ALSO MAKES SPECIAL MIXTURES IF REQUIRED

## VEGETABLE FIBRES

**BAHIA PIASSAVA (BASS)** from Brazil has unique wearing and sweeping qualities, is very resilient, holds water well, does not rot when damp and is very resistant to distortion. It is used in top quality dairy, industrial and platform brooms, and stiffer hand brushes.

**NATURAL BASSINE (PALMYRA)** from India has fair sweeping qualities, but is not resilient and may distort in use, especially when wet. It is mainly used in cheaper warehouse brooms, in mixtures for scrubbing brushes and in cheaper household brushes and brooms.

**DYED BASSINE (PALMYRA)** from India has exactly the same properties as natural Bassine but is dyed.

**CANE (PALMYRA STALKS)** from India has average wearing and poor sweeping qualities, losing much of its stiffness when wet. It is largely used in Sherbro or Polypropylene mixtures for road and yard brooms.

**CANE AND BASSINE MIXTURE** from India is generally used where price is the main consideration, as it sweeps rather poorly, wears quickly and is unsatisfactory in wet conditions. It is sometimes referred to as "GRAPE" or "APPLE" mixture. This mixture is cheap, and is in no way comparable with Piassava Bass which is superior in every way.

**BROOM GRASS** from Lesotho has average wearing and sweeping qualities, and is satisfactory in wet conditions. Used in mixtures, it is suitable for lighter domestic and yard brooms.

**GUMATI (ARENGA)** from Indonesia is softer and finer than Bahia Bass, but has similar excellent wearing and sweeping qualities. It does not crush easily or rot, and is very hard wearing and resilient. Excellent for sweeping dry concrete and smoother floors, it is ideal in brushes for warehouses.

**SHERBRO PIASSAVA (BASS)** from Sierra Leone has average wearing and sweeping qualities and does not crush or distort easily. It is mainly used in farm, road sweeping and factory brooms, and is often mixed with other materials to improve its wearing properties.

**NATURAL COCO FIBRE (COIR)** from Sri Lanka is a low cost material with average wearing and sweeping qualities. It is liable to crush and distort and tends to flatten. It is largely used in cheaper household and platform brooms. Sometimes it is mixed with Gumati or plastic fibres to improve its resilience. All Salmon Products natural coco is unbleached. From an environmental point of view we disapprove of the sulphur bleaching process which is only used to give the fibre a more golden colour.

**BLACK COCO FIBRE (DYED COCO)** from Sri Lanka has exactly the same properties as natural coco, but is dyed.

**FLAGGED BLACK COCO** is specially treated dyed Coco fibre where the ends have been flagged or split. It sweeps better than plain Coco fibre, especially in drier dusty conditions, looks much more attractive and has a softer feel. The fibre is flagged at our factory.

**MEXICAN TAMPICO** has good wearing and reasonable sweeping qualities, but is liable to crush. It holds water very well and is used in better quality vehicle cleaning, wall brushes, equestrian brushes and for polishing wood.

**MEXICAN WHISK (RICE ROOT)** is a stiff naturally crimped fibre with good wearing qualities used in grooming brushes. This fibre tends to become brittle, and therefore it is advisable to soak the fibres before use.

## VEGETABLE/SYNTHETIC MIXTURE

**UNION MIXTURE** is a Polypropylene-Bassine mixture, which has the water retaining properties of the Bassine and the wear and resilience of the Polypropylene. It is used in sink, deck, and scrubbing brushes.

## ANIMAL FIBRES

**BRISTLE** from various areas of China has excellent durability and water resistance. The softer fibre is used for shoe polishing brushes, grooming brushes and paint brushes, and the stiffer fibre for clothes, hair and toothbrushes.

**HORSE HAIR** from Uruguay and China is durable and resilient, and is ideal for use in brushes for cleaning smooth floors and windows, and in cobweb brushes.

**GOAT HAIR** from China is durable, resilient and very soft. It is almost exclusively used in high quality equestrian brushes for bringing the final gloss to horses' coats.

## SYNTHETIC MONOFILAMENTS

**POLYPROPYLENE** is very light and has good wearing properties. However, it is a little "dead" in use and has poor recovery from crushing. It is used in many bass and platform brooms and household brushes. Polypropylene can be used in hot water, but it must not be left in boiling water for more than a few seconds.

**PVC** has excellent wearing and sweeping properties, but has a tendency to "flick" in use. It can be used in a similar manner to Polypropylene, but should never be used in temperatures greater than 65°C.

**NYLON** has excellent sweeping and wearing qualities and is used in a considerable number of household brushes, platform brooms, and dairy brushes. Type 6 and type 66 can be used in boiling water and type 612 can be autoclaved at 130°C. Nylon tends to feel softer when used in wet conditions.

**POLYESTER** has excellent wearing and sweeping qualities and is now used in many of our hygiene brooms and brushes, particularly where they have to be autoclaved. Brushes filled in polyester are used in hospitals, food factories, dairies and all areas where hygiene is of primary concern. It can be autoclaved at 134°C.

Suppliers of **dressed raw materials** to the brush industry **worldwide**

Medium crimped	Soft	Soft crimped	Very Soft

## Colour Options

B = Blue	T = Orange
G = Green	BLK = Black
R = Red	GY = Grey
W = White	AM = Purple
Y = Yellow	

## 1. GENERAL

All orders are accepted on the terms, conditions and exclusions herein contained. These terms, conditions and exclusions (either taken as a whole or in any part or individually) shall not be varied, nor shall their application to any order be excluded or limited in any way whatsoever, except as agreed by us in writing; all special requirements with regard to marking, labelling, packing etc., must be agreed in writing. Any additional work will be charged at our standard rates unless such work is included in a Contract.

## 2. PRICE

Prices quoted are those ruling at the date of the quotation or as shown in our list, and shall be subject to revision if increases in cost or other circumstances arise. Prices quoted exclude Value Added Tax, Sales Taxes or any similar Taxes which will be charged additionally to the Buyer.

## 3. TERMS OF DELIVERY

a) Dates for delivery are given in good faith and as accurately as possible, but are not guaranteed. We shall be under no liability whatsoever for any delay in performance of any order by reason or in consequence of force majeure or of any matter or thing outside our control including but not limited to labour troubles, civil commotion, natural catastrophe, government restriction, shortage of supplies or customer's instructions or lack of instructions. We shall have the right to despatch any portion of the goods ordered and we shall be entitled to invoice the customer for such despatched portion so that for the purposes of payment each portion shall be deemed to be a separate contract and may be invoiced separately. Should the customer notify us of inability to receive or store goods ordered or should the customer fail to give us adequate delivery instructions when required or fail to collect goods sold ex-works, the goods will be stored at the customer's risk and expense. We shall be entitled to manufacture the goods immediately upon receipt of the customer's written order or as soon thereafter as we think fit, irrespective of any date which may be specified for delivery thereof.

b) Where the Buyer orders goods for delivery by installments each delivery shall constitute a separate contract and the Buyer shall not be entitled to refuse to take delivery of or refuse to pay for any installments on the grounds that a previous installment was defective or otherwise.

c) Unless we otherwise agree in writing our carriage paid terms are as set out below. The cost of delivery of goods below the minimum value will be charged to the Buyer at our discretion.

d) We may deliver against any order an excess or deficiency of up to 10% of the quantity ordered, provided that where there is an excess or deficiency on delivery the amount charged for the goods delivered will be adjusted proportionately.

## 4. PROPERTY IN GOODS

Until the H.B.C. has been paid in full by the Buyer for goods supplied by the H.B.C., such goods remain the property of the H.B.C. although the risk therein passes to the Buyer at the time of delivery (subject to the provisions in Clause 3(a) herein relating to storage of goods at the customer's expense), and the Buyer shall indemnify the H.B.C. against any loss or deterioration thereof or damage thereto, and without prejudice to any other remedies, the H.B.C. may repossess those goods at any time from the Buyer, and for that purpose the H.B.C., its agents and servants may enter any premises upon which the goods are situated. In the event of the Buyer reselling any goods delivered to it by H.B.C. before H.B.C. has been paid in full, such part of the proceeds of such resale as are equivalent to the price at which the goods were invoiced to the Buyer by H.B.C. shall be held by the Buyer on trust for H.B.C. and shall be placed by the Buyer in a separate account so as to be identifiable as being in the beneficial ownership of H.B.C. Further, the fact that property in the goods remains H.B.C.'s until the price has been paid in full shall not prevent H.B.C. from maintaining an action against the Buyer for the price of the goods.

## 5. RETURNABLE CONTAINERS AND PALLETS

Returnable Containers and pallets remain our property at all times and may be charged on invoice. If so charged the Buyer will be given full credit if such returnable containers or pallets are promptly returned (consigned carriage paid) to us at the point from which they were originally despatched in good condition to our satisfaction.

## 6. NOTIFICATION OF LOSS OF, OR DAMAGE TO, OR NON DELIVERY OF GOODS

Claims for damage to or loss of goods in transit must be submitted in writing both to us and to the carrier (if appropriate) as follows:-

a) In the case of non-delivery of the whole of any consignment or of any separate packing forming part of consignment - within 3 days of the date of despatch shown on the invoice or advice note (whichever is the earlier).

b) In the case of damage to or partial loss of the goods or shortages from packages - within three days of delivery. The goods received must have been signed for as damaged or incomplete.

Failing which we shall not be liable in respect of any such claim and the goods shall be deemed to have been delivered in accordance with the contract complete and in a satisfactory condition. In no case shall H.B.C.'s liability in respect of claims for damage to or loss of goods in transit extend beyond an obligation either to repair or replace free of charge any such goods or (the election to be H.B.C.'s alone) to pay to the Buyer up to the invoice price of the goods in respect of which a claim is made, and in neither event shall H.B.C. be liable for consequential loss, damage or expense howsoever arising.

## 7. BAR CODING

While every care will be taken to Bar Code goods as requested, no responsibility whatsoever is accepted for faulty coding. Customers are particularly warned against the use of self-peeler labels which can easily be swapped while goods are on display. We will not be held liable for any problems arising from Bar Coding when labels of this type are used.

## 8. PAYMENT

Unless otherwise agreed in writing, payment shall be made at the net invoice value, without any deductions, by the last day of the month following the month in which delivery was made, or in which (if ex-works), the goods were ready for collection. Failure by the Buyer to make punctual payment shall entitle us to suspend any outstanding deliveries, or to cancel the contract so far as it remains unperformed at our option, and without prejudice to our rights to claim for the price of goods already delivered or manufactured at the date of cancellation, and for loss or injury occasioned thereby.

## 9. WARRANTY AND EXCLUSIONS

a) We undertake that the goods delivered to the Buyer will be of normal industrial quality and H.B.C.'s duty to the Buyer relating to the quality of the goods delivered shall be limited wholly and exclusively to the duty to deliver goods of the aforesaid quality. Save as aforesaid any warranty or conditions, statutory or otherwise express or implied, whether oral or written as to quality of the goods or their fitness for a particular purpose are excluded and negated.

b) The application and use of the goods is the absolute responsibility of the Buyer. Any technical and other advice, information and data provided by us, whether verbally, in writing or by way of trials or tests, is given without warranty and the Buyer shall be deemed to have carried out his own tests to ensure the suitability of the goods for his intended purposes and applications and the Buyer shall be deemed to have placed no reliance on any advice, information or data provided by us.

c) The Buyer must give us immediate written notice containing full particulars of any claim that the goods are not of the proper quality to enable us to investigate the complaint before the remainder of the consignment of goods is used or returned to us. We shall not be liable for any defects in quality in the absence of such immediate notification and, in any event, our liability hereunder or in the case of any other breach of contract or misrepresentation shall be strictly limited to the invoice price of the goods proved by the Buyer to be of defective quality or to be such as to cause us to have been in breach of contract or guilty of misrepresentation and shall not extend to consequential loss of any kind howsoever arising.

## 10. CONTRACTS NOT ASSIGNABLE

This Contract is between us and the Buyer as principals, and is not assignable without our written consent.

## 11. INDEMNITY AGAINST INFRINGEMENT OF PATENTS AND RIGHTS

The Buyer shall indemnify us against all damages, penalties, costs and expenses to which we may be liable as a result of work done in accordance with the Buyer's specification which involves the infringement of any letters patent, registered design, intellectual property rights, proprietary process or otherwise.

## 12. GOVERNING LAW

This contract shall be governed by and constructed in accordance with the laws of England and the Buyer agrees to submit to the jurisdiction of the English Courts.

## 13. INSURANCE

We do not accept any liability for consequential loss.

## 14. TELEPHONE CONTACT

From time to time customers may be telephoned by our sales office. If you would prefer not to be contacted by telephone we would request that you notify us of this in writing.

The following additional points should be noted:

- Carriage paid orders comprise any items listed as standard in this catalogue. Orders containing both standard and non-standard items may result in a split delivery and either portion, if under the carriage-paid terms, may be liable to an extra carriage charge.
- Customers requiring deliveries to be booked in at specific times will be invoiced the carrier's booking-in fee.
- Uninspected consignments should be signed for as not examined. In the event of goods being damaged or there being shortages, the carrier should be notified immediately, and our office informed within 3 days, or any claims may be disallowed.
- Ownership of goods shall not pass to the customer until full payment has been made. In the case of non-payment we shall be entitled to repossess the goods, or any other goods supplied by ourselves totalling an equivalent value, or proceeds of sale.
- Because of a number of sole agencies abroad, customers are advised to contact the Company prior to exporting any of the items listed.
- The Company does not contribute towards catalogues or other publicity material belonging to third parties. This brochure plus equestrian and hygiene brochures are freely available in reasonable quantities. Most photographs in these publications are available on CD (Mac or PC format) for use in customer sales and publicity material, provided the pictures so used relate to products sold by the HBC Ltd.
